

Wave Walls divide space and act as projection surfaces, artfully dividing up a trade show space. Freestanding fabric walls are an alternative to pipe and drape. For Yahoo we created a lounge with portable curved Wave Walls - stretch fabric, LED and projected lighting working together.

The Wave Wall Large is one of our most popular Streamline Rental products. Print your logo or message on the fabric or add light to create a projection screen. Lighting, event, and exhibit designers love tension fabric for stage sets, backdrops, tradeshow booths, and room décor.

These modular walls become fabric screens in this stage set design. Light loves fabric! The Wave Walls are lightweight fabric structures that are easy to use and available for rent through Pink Inc.'s Streamline Rental program.

Modular Wave Walls acted as a room divider for a corporate event in the Morgan Library. The event space was enhanced by lighting and the fabric walls become a portable projection screen. Fabric backdrops enhance meetings, galas, corporate events, and award ceremonies.
