

**PINK PROVIDES:**

- 1 Set of Wave Wall Large Metals
- 1 Set of Large Slope Metals
- 1 Large Divide Fabric
- Extra Pop Buttons

**YOU PROVIDE:**

- Site Plan/Event Layout
- Three Person Team
- Gloves
- Sewing Kit
- Plastic Drop Cloth
- Allen Key Set

Additional Support Please Call:  
212-253-6666 or  
After Hours: 646-853-3900

Metals are labeled for easy assembly. Simply match the corresponding parts, depress the button, and slide together.

1. First locate the Large Wave Wall and begin assembly. Combine the curved pieces and straight pieces.

Prior to assembly, lay out drop cloth in designated work location. Before working with fabric, wash hands or put on gloves.

2. Join Sections. Begin with the curves, followed by the straight supports.

3. Attach the central supports to the curved ends. Join the center last.

Use of any such Design by the recipient without required purchase is strictly prohibited. ©2010

4. Stand the Wave Wall and set to the side. Now assemble the Large Slope. Begin by joining the pieces to create sections. Combine the curved and straight pieces. The top will be a different shape than the Large Wave Wall.

5. Join sections. Begin with the curves, followed by the straight supports.

6. Attach the central supports to the curved ends. Join the center last. Depending on the frame sent, the centers will either pop into place or you will need an allen key.

7. Align the two walls. The shape of the curves should be opposite one another as shown below.

Use of any such Design by the recipient without required purchase is strictly prohibited. ©2010

8. Using zip-ties, connect the metals at the top, middle, and bottom. It is best to use 2 zip-ties at the top and 2 at the bottom.

9. It is very important that the tails of the zip-ties are cut off completely and that the eyelet is rotated to be in line with the metals.

10. Locate the fabric, spread it, and unzip it. The zipper runs across the top of the Large Divide.

Zipper shown in red.

11. Lay the metal structure on its side. Lay the fabric down on the clean drop cloth and begin stretching it over the metal, starting at the bottom and moving towards the top.

If you have a ladder, you can also assemble with the metals standing up.

Any and all rights (including, without limitation, copyright, design patent, use patent and trademark) in and to all designs, concepts, renderings, or graphics (collectively, "Design") represented in this document were created by Moss Inc. and remain the sole and exclusive property of Moss Inc. Use of any such Design by the recipient without required purchase is strictly prohibited. ©2010

12. At the end, have one person pull the fabric over the metal while another one zips. The fabric is strong, so we encourage pulling hard!

13. Make sure corners and seams are straight. Align metals to create a smooth curving Large Divide.

### Final Notes:

#### Metals:

After use, dismantle. Each metal is labeled, so please place back in corresponding labeled bag. If possible, zip-tie pieces together.

Under NO circumstances should the metals be taped to one another.

#### Fabric

Each fabric is labeled on the Pink Inc. tag and should be placed back in the corresponding labeled bag.
